1	Lynette Lablack	Photo Reference - INDUSTRIALISED SOLAR'S TYPICAL, IRRESPONSIBLE ENVIRONMENTAL DESTRUCTION	Flawed Assessment & Dodgy RenewaBULL Approval Process for Much Objected to Industrialised Solar Electricity Generating Works - Resulting in Disingenuous, Irresponsible Environmental Destruction - Damaging Water Run-Off & Erosion Damage at Bomen, Wagga Wagga - Detrimentially Impacting the Distressed Neighbour's Property - Killing Crops & Rendering his Land Inaccessible for 6 months - with No One Taking Any Responsibility to Date Since 6th June 2022 to Fix this Inevitable Mess! Sediment Run-Off Contaminating Land/Water - Court Case - "Created, Operated, and Maintained a Nuisance" **Solar farm runoff pollutes property, couple awarded \$135 million - CFACT https://www.cfact.org/2023/06/06/solar-farm-runoff-pollutes-property-couple-awarded-135-million/	nil	No	Your submission has been noted. However, the Applicant is unable to provide a response to this submission as there are no specific references to Everleigh Solar Farm or its EPBC referral process.
2	Lynette Lablack	Flawed Assessment & Didgy RenewaBULL Approval Process for Much Objected to Industrialised Solar Electricity Generating Works - Bomen, Wagga Wagga Reference	No email contents however attachments sent that have been forwarded onto department.	nil	No	Your submission has been noted. However, the Applicant is unable to provide a response to this submission as there are no specific references to Everleigh Solar Farm or its EPBC referral process.
3	Cedric Ceed	Everleigh Solar, Chinchilla	Dear DPIGROUP, I would like to put an objection in for the Everleigh solar factory. I am unable to work out how to go through a portal and would appreciate if you could upload my objection please. I have no donations Cedric Creed Goovigen Q 4702 I formally object to the Everleigh Solar Factory because it will cause irreversible damage to the environment in the Queensland landscape These types of developments contain "Cadmium telluride, copper indium selenide, cadmium indium gallium telluride, silicon tetrachloride and lead are also added to the silicon [in panels] for greater electrical efficiency" (ref: Statement of evidence of Professor Ian Rutherford Plimer Sep 2022) that leach out over time into our soils and water. I the case of a fire starting many toxic chemicals are released into the air as well. These companies have no real way to prevent such a scenario. We have been dealing with a company in the Banana shire and their documentation is full of flashy and non-committal words to get the project approved. This no doubt will be the same. Thank you, Cedric	nil	No	Your submission has been noted. The materials referred to in your submission are used in a specific technology called Thin Film. Everleigh Solar Park is not proposing to use Thin Film technology. The technology proposed for Everleigh Solar Park is Silicon PV modules, which do not contain Cadmium telluride, copper indium selenide or cadmium indium gallium telluride.
4	Lynette Lablack	Everleigh Solar Electricity Generating Works - EPBC Number 2022/09339 OBJECTION SUBMISSION	I absolutely OBJECT to this ghastly, contaminating plan for an obnoxious Industrialised Solar 'Dump' & Associated Infrastructure that would be a Visual Amenity Nightmare of Glaring Solar panels for the local Chinchilla Community & an Unethical Slave Labour based, risky Moral Hazard for Chinchilla Shire Council. I Object on the following grounds:- Q1- Loss of Ag Land Threatens Food Security Q2- Increased, Seriously Toxic - Carcinogenic & Teratogenic Fire/Smoke Hazard Risk Q3- Solar Panels Leach Numerous, Toxic Contaminating Heavy Metals including Lead - as they age, degrade on site, if inferior, broken, fractured by hail, burnt, etc. Q4- Personal Discomfort caused by Electrical Force (classed as Criminal Assault) Q5- Unreliable, Inferior, Intermittent, Weather Dependent, Part Time Power Q6- Unethical, Cruelly Tortured Uyghur Slave Labour supply chain sourced Solar Panels Q7- Creates a Massive Pile of Unplanned for Toxic Waste Q8- Glaring Visual Amenity Nightmare Q9- Extremely Costly Subsidised Energy Deprivation Q10- Ruination of Our Children's Intergenerational Equity Q11- Sovereign 24/7 Independent Australian Power is Essential for Australia's National Security NOT this CCP Reliant Energy Poverty, Fake Green, RenewaBULL Solar Grift & Ponzi Scheme/Scam This is a selfish, greedy & totally detrimental Developer/Host plan for 139 MW Solar Electricity Generating Works - which is a total waste of taxpayers money as it is an unreliable, Stone Age weather dependent technology - based on inferior, part time power - which is against Australia's best interests & will forever contaminate our Limited, Irreplaceable Food Producing Land - this 209 ha site, the surrounding land - vital water sources. Everleigh Solar is the antithesis of Caring for Country, defies ALL the Principles of Ecological Sustainable Development, will NEVER protect the land for future Primary Production, has totally ignored the Modern Slavery Act, the New Modern Slavery Condition & Amended Storm Water Management Plan - failing to recognise the obvious onsite contamination risks to our life sustaining FOOD resource land & vital water sources(Oxley Bridge Rd Solar Uranquinty Determination.)	nil	No	Your submission has been noted. The Australian Government and state governments are working together to support renewable energy including solar power, attracting and facilitating game-changing foreign direct investment into Australia (Source: https://www.globalaustralia.gov.au/industries/net-zero/solar-energy/). Since 2015, the Queensland Government has been actively supporting the renewable energies to reduce emissions, create new jobs and diversify the state's economy by establishing a 50% renewable energy target. The Queensland Envery and Job Plan, released in September 2022, aligned with that long-standing target, introduced new commitments: 70% renewable energy by 2032 and 80% by 2035 (Source: https://www.qld.gov.au/about/newsroom/queensland-energy-and-jobs-plan). Following the QLD Government solar siting guidelines (Source: https://www.epw.qld.gov.au/_data/assets/pdf_file/0012/16122/solar-farm-guidelines-communities.pdf), the Applicant engaged with multiple conversations with the Western Downs Regional County officers. Everleigh Solar Park received not only the approval from the Council, but numerous positive comments remarking the Applicant had selected one of the best spots within the region to develop a solar farm. Therefore, Everleigh Solar Park is aligned with the Australia Government and the Queensland Government renewable energy targets and with the Western Downs Regional Council plans. Below the Applicant provides specific response to the queries raised in your submission: Answer Q1: The site for Everleigh Solar Park has been specifically located to avoid good quality agricultural land. A key land use outcome for the Western Downs region is to protect areas of highly productive land uses from competing activities such as energybased resource activities. The proposed development is not located within Priority Agricultural Land as mapped under the DDRP 2013, therefore the Project does not compromise the agricultural potential of the land. The Applicant engaged on a number of occasions with Western Downs Regional Council who expressed their satisfaction for the solar farm siting selection. Additionally, the soils composition is not suitable for commercial agricultural purposes. Finally, this matter was properly addressed as part of the Development Application Answer Q2: Multiple scientific reports confirm that there is no proof that solar panels are causing cancer. In reality, solar farms and panels may be a smart way to lower the risk of lung cancer in general. They frequently serve to balance out other electricity-generating sources that could add to air pollution, which could result in lung cancer.
			This plan DOES NOT align with regional and local land use plans & objectives. NONE OF the Developer's claims are true! Chinchilla Local Environmental Plan (Chinchilla LEP) The subject land is zoned RU1 Primary Production "To encourage sustainable primary industry production by maintaining and enhancing the natural resource base ... and the commitment to maintain soil capability after decommissioning.... the natural resource base is likely to be enhanced." "The solar farm would be highly reversible with no adverse impact on land capability and therefore primary industry enterprises, after it is decommissioned.After decommissioning, most above ground infrastructure would be removed and the site returned to its existing land capability, for continued agricultural or alternative appropriate uses." **WHERE ARE THE RESEARCH FACTS - THE SCIENTIFIC DETERMINATION TO PROVE THIS? **Labor supports an independent scientific body to review, examine and investigate resource industries and large scale power generation impacts, including industrial solar, battery and wind installations at every stage of operation, i.e. planning, operational and rehabilitation." WHAT ABOUT THE PRECAUTIONARY PRINCIPLE - re- Likely Serious/Irreversible Environmental Risks/Harm from Solar's heavy metal leachate during its OPERATIONAL LIFE as Solar panels age, degrade, if inferior, broken, fractured by hail, compromised due to foundational fractures, if burnt - with residue causing irreversible harm (Finley Fire Report,) etc. **WHAT ABOUT STERILISATION OF THE SOIL & DRY-LAND SALINITY - caused by decades long entombment of Ag Land?	nil	No	Answer Q3: Everleigh Solar Park bases its solar system design in first tier components (solar modules, inverters, structures, etc) in full compliance with the Australian environmental regulations and requirements. As already mentioned, the project is avoiding the use of technologies, like thin film solar modules, which components in very rare and uncommon cases, could be potentially harmful for the environment. Answer Q4: An extremely small and weak electromagnetic field is created whenever electricity is produced by solar panels and transmitted to the power grid. The World Health Organization reports that exposure to low-level electromagnetic fields has been studied extensively, with no evidence of any conclusive harm to human health. Answer Q5: Everleigh Solar Park is aligned with the Australian Government and the Queensland Government renewable energy targets. Answer Q6: The Applicant is committed to only use materials and equipments that are in full compliance with the Australian Government ethical requirements. Answer Q7: More than 96% of the materials and equipment of a solar farm (steel, copper, aluminium...) can be easily recycled at the end of the useful life. Answer Q8: Monocrystalline technologies have none or insignificant glare impact. As strong evidences being that the case, it is worthwhile to mention the solar farm opened at Melbourne Airport by January 2022 (one of the largest Australia solar farms), the solar farm at Darwin International Airport or the solar farm at Brisbane Airport. Additionally, the project is located on a site with no visual amenity to any neighbouring property or the road. Answer Q9: Everleigh Solar Park is not a subsidized energy project and will compete in the market with other technologies based on non-renewable energy resources. Answer Q10: As previously mentioned, the Everleigh Solar Park is fully aligned with the Australian and Queensland Government

E-mail Number	Submitter Name	Title	Details of the submission	Submitter recommendation	Change to Public Report	Applicant responses to submitter
			<p>**WHERE IS THE UPFRONT DECOMMISSIONING/REMEDICATION - STORM/FIRE DAMAGE CLEAN-UP BOND PRIOR TO CONSTRUCTION? As is required for the Coal industry.</p> <p>**THIS PLAN TOTALLY FAILS THE CLIMATE CHANGE BILLS & RENEWABLE TARGETS eg. Skyrocketing prices & energy poverty due to weather dependent, unreliable RE, Deceptive Sunk Costs (Debunked CSIRO Gencost Report.) Embedded CO2 in Solar Panels (Embedded CO2 Reference) & BESS, Loss of Economic Prosperity, Jobs, Industry/Manufacturing - due to the Loss of our Affordable, Australian Power Advantage, NO PRODUCTIVITY, National Security Nightmare, Environmental Destruction/Vandalism caused by Industrialised Solar at Bomen, Wagga - NOT Clean, Green, Sustainable or part of a Circular Economy at all.</p> <p>Defies ALL the PRINCIPLES OF ESD - ECOLOGICALLY SUSTAINABLE DEVELOPMENT!! (Reference: Series of Photos & Video emailed to you on the 31st July.)</p> <p>**WHY HAVE THEY INTENTIONALLY LEFT OUT & IGNORED MODERN SLAVERY ACT, THE NEW MODERN SLAVERY CONDITION & THE AMENDED STORMWATER MANAGEMENT PLAN CONDITION?</p> <p>**Labor will ensure that energy infrastructure and the production of wind and solar infrastructure, comply and adhere to the Modern Slavery Act, with a focus on international imports.</p> <p>This Plan Totally Defies All of the following claims:- Climate Change Bill 2022 *focused on creating jobs, cutting power bills and reducing emissions by boosting renewable energy (Reference: Solar's Embedded CO2 Emissions.) Electricity Strategy The three objectives of the Qld Government for the state's electricity system, as stated in the Qld Electricity Strategy are ALL DEFIED BY THIS RUBBISH PLAN:- 1. Reliability 2. Affordability 3. Sustainability.</p> <p>The Qld Government's Electricity Strategy IS NOT & WILL NOT EVER ACHIEVE:- • Improve the efficiency and competitiveness of the Qld electricity market by reducing risk, cost, * Energy Security Target *minimises costs to consumers and taxpayers and does not give rise to moral hazard risk. • achieve the objectives for the electricity system which include reliability, affordability and economic growth and sustainability. The contribution of the Project to local employment and economy THERE ARE NO POSITIVE BENEFITS TO AUSTRALIA FROM EVERLEIGH SOLAR WHATSOEVER! There are numerous threatened species, migratory species & ecological communities impacted by this plan - including loss of koalas, Dunmall's Snake, Nelson's Panic & potentially the Rufous Fantail. Toxic Solar Contamination & Pollution will inevitably contaminate our vital, life sustaining water sources - the 4 onsite creeks - the Wambo Creek, the Condamine Creek & Ramsar Wetlands. AUSTRALIANS DESERVE FAR SUPERIOR, RELIABLE, EFFICIENT, SECURE AUSTRALIAN COAL, GAS & A CLEAN, SAFE NUCLEAR POWER FUTURE NOT THIS RUBBISH INDUSTRIALISED, TOXIC SOLAR PLAN!</p>	nil	No	<p>plans.</p> <p>Answer Q11: The Applicant agrees on the importance of the Australian sovereign energy independence. The Applicant refutes the submitter's claim contrary to the Australian Government and the Queensland Government plans to diversify the energy sources fostering the renewable energy sector to consolidate and preserve such independence.</p> <p>Additionally, in response to the general claim about the potential impact of the project to the flora and fauna, to be noted that the location of the panels has been selected and refined to avoid areas of highest quality habitat and maintain refuge for listed species. A full impact assessment has been carried out and is outlined in the publicly available technical memo and ecology report. This assessment takes into consideration current conservation advice and other relevant documentation provided by DCCEE, and has been used to inform a suite of mitigation and management strategies aimed at limiting any negative impact to local fauna.</p>
			<p>The Qld Government's Electricity Strategy IS NOT & WILL NOT EVER ACHIEVE:- • Improve the efficiency and competitiveness of the Qld electricity market by reducing risk, cost, * Energy Security Target *minimises costs to consumers and taxpayers and does not give rise to moral hazard risk. • achieve the objectives for the electricity system which include reliability, affordability and economic growth and sustainability. 			<p> **Australian Independent Energy = Coal, Gas & a clean, safe, Nuclear SMR Power future. **Which companies involved & all of their Solar/Wind/BESS connections are subject to the CCP's National Intelligence Law? **Public Health & Safety Risks - Electric Force & Electromagnetic Radiation, Soil/Food/Water Contamination, Energy Deprivation. **Proper Research Needed - No Scientific Rigour. ** Engineering Facts Have Been Ignored. **Connecting Subsidised, Mandated Weather Dependent - Intermittent Solar/Wind to the Grid is the Worst Policy Failure in History. **Fake Green - Not Clean & Green or Sustainable at all - as the Full Lifecycle of Solar/Wind/BESS has to be accounted for. At least 1,000% more Mining + intensive energy & toxic pollution during processing. **Power Sources Needed in major City areas instead - avoiding long distance transmission loss, ruination of rural Australia & harming Agricultural productivity. **Unconscionable scale of Industrialised Solar/Wind land mass required. Michael Shellenberger says it's approx 300-800 times more land required for Solar/Wind than for far superior conventional power generation. **Massive Toxic Waste Burden being intentionally created for future generations that will NEVER be economically viable to recycle - if ever even possible. **Energy Security risks from inferior, unreliable, weather dependent, Dunkelflaute based Solar/Wind which will NEVER be base-load power available on demand. **Economic Suicide - Skyrocketing Energy Prices = Cost of Living Crisis. The more Mandated, Subsidised Solar & Wind in the system = the Higher the Prices. **National Security Risks - we need to rely on our own AUSTRALIAN Energy Sources rather than our Most Hostile Enemy - the CCP. **Fake Green Wokeness = Weakness **Unethical Slave Labour Supply Chain Reliance - Solar's cruelly tortured Xinjiang Uyghurs & Cobalt for Wind Turbines + Batteries reliant on shocking treatment of the Congolese - with Child Labour - children as young as 6 years old forced to mine toxic cobalt in the Congo with their bare hands! **No Social Licence - Failed Consultation process by GOVERNMENTS, AEMO, NETWORKS & DEVELOPERS. **Immediate Moratorium & Federal Independent Inquiry is Essential </p>
